

Society for Pediatric Pathology

Slide Survey Program and Slide Survey Online (SSO) 2011

Background: It is critical for all pathologists to maintain and expand our diagnostic skills in diseases of infancy (including placental pathology), childhood and adolescence. The ability to recognize the diversity of clinical, gross, microscopic and molecular features of a disease is essential to arrive at an accurate diagnosis and to provide sound clinical advice.

Needs Assessment: The ability to recognize the gross, microscopic, and molecular features of a disease and to correlate the pathologic findings with clinical presentation is key to providing accurate diagnosis and serving as medical consultants.

Slide Survey: The Slide Survey Program of the SPP is intended for all pathologists and pathology trainees. It consists of 18 cases per year (3 sets of 6 cases each, including 5 glass slides and 1 on-line only case). Case material is representative of diseases seen in the practice of pediatric pathology. The online component (**SSO**) of the slide survey includes virtual microscope slides, digital (PDF) versions of the booklets and the electronic answer-submission sheets, as well as survey analysis, case discussion, and case archives. Participants can expect to spend approximately one hour on each case, including reviewing the history and slide, arriving at a diagnosis, answering the questions, and reviewing the contributor's summary and case discussion. Access to the SSO is available to all subscribers. Glass slide subscription is available to all SPP members (U.S. and international), as well as non-SPP members with a mailing address in the U.S. or its territories. Glass slide subscription is not available to international participants who are not SPP members.

Program Objectives: By reviewing the case material, arriving at a diagnosis, answering the submitted questions, and reviewing the contributor's summary and discussion, the participant will gain practical information meant to improve diagnostic skills and increase understanding of the conditions submitted for evaluation. Individual evaluation is not provided and the program is not approved as or meant to be a formal proficiency program.

CME: The Society for Pediatric Pathology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Individual subscriptions allow CME credit for a single participant. Institutional subscriptions allow CME credit for up to 5 participants.

ABP - Maintenance of Certification: The slide survey program is approved by the American Board of Pathology for Part IV (Performance in Practice) Maintenance of Certification. Therefore, diplomates of the ABP may use this program to demonstrate laboratory and/or individual participation in a laboratory / interlaboratory performance improvement and quality assurance program.

AMA Designation Statement: The Society for Pediatric Pathology designates this educational activity for a maximum of 18 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Note: A maximum of 18 CME credits can be earned (1 CME credit per case). The actual number of CME credits earned by a participant will be based on responses entered by the due date.

Subscribing: Please sign-up online or complete the form, and submit it to the SPP office by e-mail, mail, or Fax. **Subscription deadline: April 1, 2011.**
